ImageAnnotator User Guide
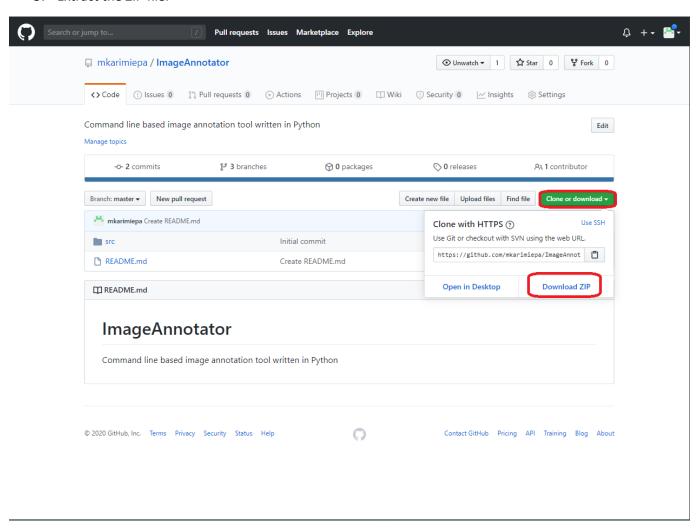

Setup

Prerequisites

- ***To run the program, you must have Python 3.7+ installed on your computer.***
- ***You must have a Microsoft account with Microsoft OneDrive access***
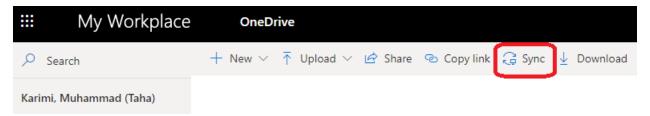

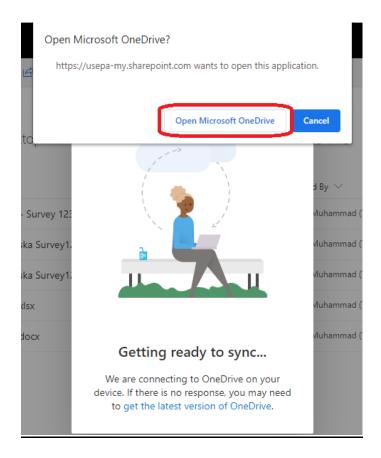

Step 1. Accessing and Downloading the ImageAnnotator

1. To download the ImageAnnotator, go to the following GitHub site: https://github.com/mkarimiepa/ImageAnnotator, and click "Clone or download" on the right-hand side.
2. Then choose "Download ZIP" and select any location to download the ZIP file.
3. Extract the ZIP file.

Step 2. Getting access to the OneDrive

1. The OneDrive folder "ImageAnnotation" should have been shared with you, and you will receive an email with the link.
    a. If you have not, please reach out to either Taha Karimi (Karimi.muhammad@epa.gov) or Timothy Boe (boe.timothy@epa.gov).
2. Once you receive the email, **connect to the VPN** (if you are not in the office), and then click on the link.
3. Follow the directions, and log into SharePoint.
4. Once you have logged into SharePoint, you will see the "ImageAnnotation" folder and its contents. In the top toolbar, select the "Sync" button, and when prompted, click to "Open Microsoft OneDrive". **See 2 Screenshots below.**
5. Once this is done, the "ImageAnnotation" folder will now be synced to your Microsoft OneDrive account, giving you access to it's contents, and thus allowing you to run the program.

Use

As for the use of the software, it is relatively simple, and instructions are also provided when starting up the program.

<u>Running the Program</u>

To run the program, you must
